

- Convenient range setting board
- Innovative materials and robust structural design
- Volume range of 10 μ l to 5ml can be dispensed
- Operation is simple and easy
- Lightweight, ergonomic handle and wide finger rest minimize hand strains
- Positive displacement design ensures accurate results
- Especially designed for viscous, volatile, or other problematic liquids

Technology Services Future

BIO-DL Stepper

BIO-DL Stepper

The BIO-DL Stepper is an adjustable dispenser for rapid, one-handed repetitive dispensing. The stepper operates on the positive displacement principle, offering simple and efficient repetitive dispensing. This convenient repeater pipette dispenses up to 44 times in a row, this offers simple, flexible, multiple and equal dispensing.

Specifications
